

# YC-1320L

### Real Air Cooling

The multi-duct vortex refrigeration system and finned evaporator can prevent frosting completely and improve temperature uniformity to a large extent.

### Real Energy Saving

The refrigerator is equipped with "M + Energy Core" power management system and complete air cooling design, improving energy saving efficiency by more than 40%.

#### YY Real Visibility

The electrical heating + LOW-E design with double considerations can achieve a better anti-condensation effect for the glass door.

### Real Safety

6 temperature probes can ensure high precision of temperature control with nearly no fluctuation and thus can improve safety.

#### **Intelligent Temperature Control**

- · High-precision microcomputer temperature control system with build-in control/alarm sensors for High/low temperature, ambient temperature and evaporator temperature etc. ensuring the safe and stable running.
- $\cdot 1$  inch high brightness digital temperature display with 0.1°Cdisplay precision; the temperature can be set freely.

#### **Security System**

- ·The well-developed audible & visual alarm system with multiple audible & visual alarm functions: high temperature alarm, low temperature alarm, sensor failure alarm, door ajar alarm, power failure alarm etc;
- •The turn-on delay and stopping interval protection function can ensure reliability in running:
- · The door is equipped with a lock, preventing it from opening accidentally.
- ·Refrigerator programmed to alarm again if alarm event still existed 30mins after Muteon,this can help avoid any unknown alarm event to happen.

#### **Refrigeration System**

Equipped with a compressor supplied by an international famous Secop brand, high-efficiency air-cooled condenser and finned evaporator, ensuring fast refrigeration.

#### Optional chart recorder

- · This technology provides you with temperature recorders without electronics.
- · No power supply is required.
- · European imported brand , durable and reliable

#### **Data Storage**

- · Equipped with a USB export interface, which can be used for exporting data in PDF;
- · When a U-disk is connected, temperature data can be stored continuously and automatically (data can be stored for 100,000 sets of data);
- · The printer is optional.

#### **Lighting System**

Equipped with lighting system with LED lights, ensuring high visibility inside the cabinet.

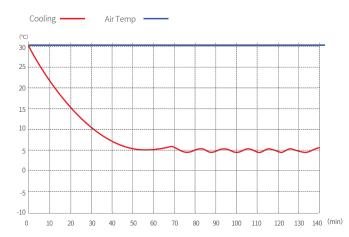

#### **Human-oriented**

- $\cdot \mbox{Equipped with high-quality shelves made} \\ \mbox{from PVC-coated steel wire} \ , \mbox{which are easy to} \\ \mbox{clean};$
- ·Aluminum door handle, easy to open, easy to move.
- $\cdot \text{Equipped with testing port, bringing} \\ \text{convenience to users in testing temperature} \\ \text{inside the cabinet.}$

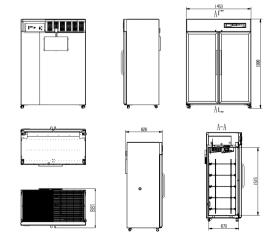

# Scope of Application

Suitable for storage of biological products, vaccines, drugs, reagents, etc. Suitable for use in pharmacies, pharmaceutical factories, hospitals, centers for disease prevention & control, clinics, etc.
